Quality System  Roberto Bresciani	Quality Manager  Massimo Svanera	CEO  Paola Artioli

Asonext Top Management recognizes that:

**Nuclear Safety Culture (NSC) is the core values and behaviors resulting from a collective commitment by leaders and individuals to emphasize safety over competing goals to ensure protection of people and the environment.**

The company will achieve this high standard of Nuclear Safety performance through a systematic approach that promotes Nuclear Safety Culture and continually improves behaviours, effectiveness of processes, and understanding performance expectations.

Our commitment include:

- Making safety (including Nuclear Safety) first and foremost in our decision making
- Recognizing that all individuals have a personal responsibility for safety
- Embracing a non-blaming culture, to help promote openness and good working condition
- Ensuring that appropriate decision at all levels that affect nuclear safety are rational, objective, transparent and prudent
- Ensuring that our personnel are highly skilled and suitably experience
- Gaining a thorough understanding of our customer's requirements and the requirements of the end user
- Providing clear and adequate instruction to employees and to everyone in our supply chain
- Considering all the opportunities to learn about ways to ensure safety are sought out and implemented
- Maintaining traceability and accountability

Top Management commits to transmit this policy to all organization levels and undertakes to continually maintain monitored the correct application of Quality Management Systems requirements on Safety Culture, through training / communication of its employees, involving them in their activities and in the pursuit of continuous improvement and the achievement of objectives, including CFSI (Counterfeit, Fraudulent, and Suspect Items).

Asonext S.p.A. appointed **Mr. Massimo Svanera** and **Mr. Roberto Bresciani** to manage NSC and CFSI to ensure the effectiveness of the Prevention System.
